- Bar

# SPECIFICATIONS

*Collaboration..... 05*

*Construction..... 06*

*Renovation..... 07*

*Architecture..... 08*

# Collaboration

*We work on quality and timely project completion. Similar racial collaboration develops cooperation between team members.*

*Collaboration helps define Non-Negotiables whether it's deadlines, budget or equipment. Aids in pooling different ideas and skills that can make a job done better. Collaboration encourages and stimulates teamwork and information sharing.*

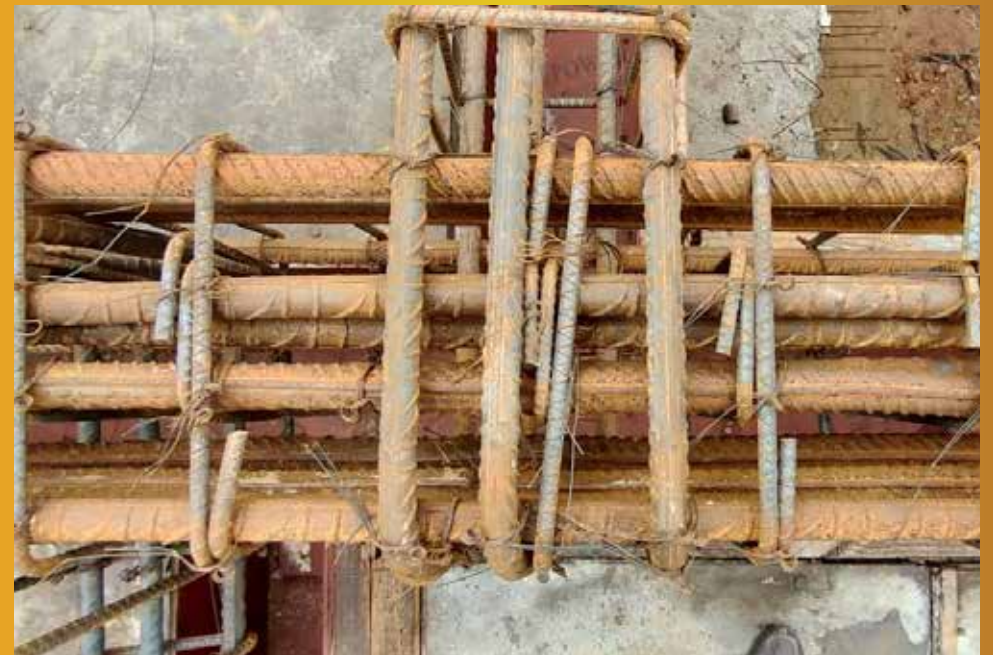

# Construction

*It starts with planning, financing, design, execution, build and also covers repairs, maintenance and improvement work.*

*Construction for us refers to the art and science to form objects, systems or organizations. It includes the erection, maintenance and repair of buildings.*

# Renovation

*Some renovations are subtle, hyper focused on a specific element and some are more substantial, overlapping with remodelling.*

*Renovations are often more cost effective than new constructions and also add value to the structure or building.*

*Renovation involves the upgradation of an existing structure to improve performance by either altering the scope of structure, providing additional facilities or improving existing additional facilities.*  
*Our goal is to repair and restore the structure.*

# Architecture

*Architecture for us is a passion, a vocation, a calling as well as a science and a business.*

*We serve both utilitarian and aesthetic ends.*

*We practice the art of designing and building edifices for human use taking both aesthetic and practical factors into account.*

*It's the design activity from the macro-level (urban design, landscape architecture) to the micro-level (construction details and interiors).*

**THANK YOU**  
**FOR YOUR TIME & INTEREST**
